

# Burgoynes

consulting scientists and engineers

---

## New Office

After our announcement in December 2018, the Partners are pleased to announce that our first Australian office is now open for business. Dr J H Burgoyne & Partners (Australia) Pty Ltd will be headed by Mark Cousins (an experienced and practical Chartered Electrical Engineer and a Certified Fire Investigator) who is now based in Melbourne. For over 50 years Burgoynes has been serving the insurance and legal sectors. Mark, who has been with Burgoynes since 2002, specialises in investigation of fires, explosions and electrical incidents, both on land and those involving seagoing vessels. We are confident that his thorough scientific investigations, together with his enthusiasm for getting to the root of any challenge, will be warmly received by our clients in Australia and the wider Australasia region.
